EDUCATION

University 2023
faculty of computer and information at **Assuit university**

Skills I Learned In Computer Science

Programming languages :

C++   C#   php   Python   R   Go

Oprating Systems :

Windows   Ubuntu   Kalli   Claud Computing,

SAMMARY

My profession is Front End Developer. A challenging opportunity as a Developer in a reputable company would allow me to upgrade and develop my experience and knowledge. View.JS and React.JS are some of the JS frameworks I am familiar with. Regardless of which one you have, I can convert it to the other. Additionally, I have a good understanding of the backend. I've worked with Laravel PHP on some projects Additionally, I have previous experience designing and using software like XD, Photoshop, and Figma

Web SKILLS

Web Devolopment

Javascript   ReactJS   Redux   Redux Toolkit   VueJS   Vuex   jQuery   HTML 5   Css3   Sass
Git   Github

Design

Photoshop   Figma   XD

PROJECTS

1 - Pato Restaurant :   https://maha4gaber.github.io/OnlineShop/

A Commercial Site That Displays Various Products And Adding Them To The Card, While Increasing The Number Of The Product Or Deleting It, I Made It For The Application To Use The API In Reac

Tools

React.js   Redux   Redux Toolkit   Bootstrap   Axios   Laravel Api

2 - Online Shop :   Github Link

A Commercial Site That Displays Various Products And Adding Them To The Card, While Increasing The Number Of The Product Or Deleting It, I Made It For The Application To Use The API In Reac

Tools

React.js   Redux   Redux Toolkit   Bootstrap   Fack API

3 - Connoisseur Restaurant :   Github Link

A Site That Displays The Restaurant's Products To The User, Information About The Restaurant, People's Opinions, And Each Product Separately, And People's Opinions About It, And Here The User Can Order This Product. He Can Use A Form To Register The Data If He Is Not Logged In, Then He Will Be Transferred To The Registration Page Or Log In If He Has An Account, And Then Request The Product To Leave An Account On This Product And The Site's Feedback

Tools

Vue.js   JSON server   Bootstrap   validations   Axios
